HACKMINDS OFFICIAL EXAMINATION REPORT

Challenge: Linux Challenge #002 — Operation: The Missing Files Mystery

Participant Name/ID: FAOYE OLUWALEYE O.

Examination Status: COMPLETED

Evidence Received:

- 15 terminal screenshots.
- Written responses to 8 knowledge assessment questions.
- Participant's declaration of independent completion.

Time-limit Statement: Not independently verified. The submitted screenshots do not establish the complete examination duration.

MARK BREAKDOWN

Assessment Area	Maximum	Awarded
Part 1 — Investigation Workspace	15	15
Part 2 — Evidence File Creation	15	15
Part 3 — Hidden Evidence Investigation	15	15
Part 4 — Temporary File Operations	15	15
Part 5 — Permissions and Access Control	15	15
Part 6 — Evidence Search and Audit	15	15
Part 7 — Archive and Verification	10	10
TOTAL	**100**	**100**

ASSESSMENT FINDINGS

Part 1 — Investigation Workspace: 15/15

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- HACKMINDS_CASE directory created.
- Required main directories created.
- Nested directory structure created.
- Directory structure verified using terminal output.

Part 2 — Evidence File Creation: 15/15

Status: SUCCESSFULLY VERIFIED

All five required files were created in their appropriate directories.

Evidence confirms their contents:

- suspect.txt
- system.log
- backup.txt

- final_report.txt
- clue.txt

File contents were displayed and verified.

Part 3 — Hidden Evidence Investigation: 15/15

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- Hidden evidence file created.
- Hidden visibility demonstrated.
- File contents displayed.
- Hidden file successfully located from the main case directory.

Part 4 — Temporary File Operations: 15/15

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- First temporary file created.
- First temporary file renamed.
- Second temporary file created.
- First temporary file's contents verified.
- First temporary file removed.
- Remaining temporary file identified.
- Remaining file contents displayed.

Part 5 — Permissions and Access Control: 15/15

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- final_report.txt permissions changed.
- Owner-only read/write permissions demonstrated.
- Permission string verified.
- Numeric permission value 600 confirmed using terminal output.
- suspect.txt permissions inspected.
- Original evidence file contents demonstrated.

Part 6 — Evidence Search and Audit: 15/15

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- system.log located.
- Phrase "investigation" successfully searched.
- Seven regular files identified and counted.
- backup.txt contents displayed.
- Remaining temporary file identified.

Part 7 — Archive and Verification: 10/10

Status: SUCCESSFULLY VERIFIED

Evidence confirms:

- Compressed archive successfully created.
- Archive existence verified.
- Archive contents displayed.
- SHA-256 checksum generated.
- Checksum verification successfully completed with an "OK" result.
- Checksum value displayed.

FINAL RESULT

Assessment	Result
Score	100/100
Percentage	100%
Classification	Linux Investigation Specialist
Pass Mark	75%
Status	PASS

ASSESSMENT FINDINGS SUMMARY

Successfully verified tasks: All seven assessment areas.

Unverified tasks: None among the seven practical assessment areas.

Missing or unclear evidence: Examination completion time was not independently established.

Evidence integrity concerns: No material evidence-integrity concerns identified from the submitted screenshots. Some unsuccessful command executions were visible, but subsequent successful operations provided the required verification.

KNOWLEDGE ASSESSMENT

The participant also submitted responses to all eight theoretical questions.

Examiner's observation:

The responses demonstrate a good understanding of:

- Linux file and directory management.
- Hidden files.
- Temporary file management.
- File permissions.
- Access control.
- Compressed archives.
- Checksum verification.
- Evidence integrity.

The theoretical responses are consistent with the practical activities demonstrated.

Note: The theoretical assessment is recorded separately and does not alter the 100-mark practical score.

EXAMINER'S REMARK

The participant demonstrated excellent practical execution across all seven assessment areas.

The submitted evidence shows successful completion of the required directory operations, file creation, hidden-file investigation, temporary-file management, permission configuration, evidence searching, and archive verification.

Particularly commendable is the successful verification of the compressed archive using its SHA-256 checksum.

The participant demonstrated the ability to perform practical Linux filesystem operations and maintain evidence integrity throughout the demonstrated investigation.

Overall, this is an excellent performance.

■ OFFICIAL EXAMINATION VERDICT

PARTICIPANT: FAOYE OLUWALEYE O.

FINAL SCORE: 100/100

CLASSIFICATION: LINUX INVESTIGATION SPECIALIST

STATUS: PASS — EXCELLENT PERFORMANCE

HACKMINDS LINUX CHALLENGE #002

Operation — The Missing Files Mystery

EXAMINATION COMPLETED SUCCESSFULLY.

Examiner's Decision: APPROVED.
